## BASIC GAS HEAT TECHNOLOGY

This 2-day course serves as an introduction to any type of gas heat technology for those who are either in the oil heat industry or who have never had formal training on gas heat. The course is focused on real world everyday need to know topics. Theory is introduced only as needed for understanding the troubleshooting aspects of basic burner service.

Technicians will be instructed on Natural Gas appliances so that they may know the natural gas combustion process, types of equipment, controls, how to set up and troubleshoot gas burning equipment.

**Class Requirements:** At least two years experience in the heating field.

**Technician should bring:** Basic hand tool kit and calculator

**THERE WILL BE LIVE DEMONSTRATIONS**
