9:00 a.m. - 4:00 p.m.

In today's competitive world, one of the service technician's most important responsibilities is to see to it that your customers' heating systems are operating as efficiently as possible.

Efficient equipment is more reliable, cleaner, and more economical. Customers with efficient heating equipment are more satisfied with their service provider, oil dealer and oil heat.

The Riello seminar offers comprehensive installation and service instruction, plus latest information on advanced burner technology.

The Peerless seminar will cover boiler applications from residential through commercial. Peerless Boilers is a leading manufacturer of ENERGY STAR approved heating equipment. By using ENERGY STAR products in your home, you can battle global warming and pollution all while saving money. More efficient appliances lead to lower energy bills.

We will cover the cast iron line as well as the Peerless Pinnacle high efficiency, oil-fired condensing boiler that offers 93% + efficiency and is ENERGY STAR compliant.

Representatives from both the Riello Corporation and Peerless Boilers will present this specifically designed seminar to enhance the knowledge of oil heat service technicians, regardless of years of experience.

This is a comprehensive full-day seminar on product knowledge, application and troubleshooting.

PPMCSA Training Center limited seating 24
